

**MAKE CALF A YEAR PROGRAM SUCCESSFUL**

**CATTLE FEED SUPPLEMENT FOR FERTILITY MANAGEMENT**

**Composition :**  
Each kg provides

Nutrimark (Tropical Seaweeds)	180 g
Calcium	175 g
Phosphorus	60 g
Manganese	30 g
Zinc	30 g
Cobalt	6 g
Copper	5 g
Iodine	1.5 g

**Advantages of Seaweeds**

Macro and micro minerals in seaweeds offer maximum availability of these nutrients as they are chelated naturally. Moreover, antioxidant properties of seaweeds help in maximum availability of minerals by acting on FREE RADICALS. This advantage is not available from any other product. In addition, seaweeds also provide excellent amino acid profile for building body cells.

**Advantages of glycine chelates**

Glycine has a low molecular weight with a high bonding capacity to the mineral. Hence, it is absorbed quickly compared to Methionine or cystine chelates.

**Benefits**

- 1 Maintains perfect body metabolism throughout the growth period so as to achieve Puberty on time, to get conception in the first heat and to maintains healthy pregnancy for smoother calving.
- 2 Maintains positive energy balance before and after calving and through out lactation period to prevent ketosis and related problems.
- 3 Prevents all problems related to infertility like anestrus ,silent heat and repeat breeding.
- 4 Promotes healthy growth of udder to get maximum milk yield.

**Feeding recommendation :** Adult cows and buffaloes 50 g per day  
Heifers 30 g per day
