

FLIES

ARE NOT JUST THE

PROBLEM

THEY ARE THE

MAJOR

CAUSE OF ALL

YOUR

PROBLEMS

To **COMBAT** With **FLY MENACE**

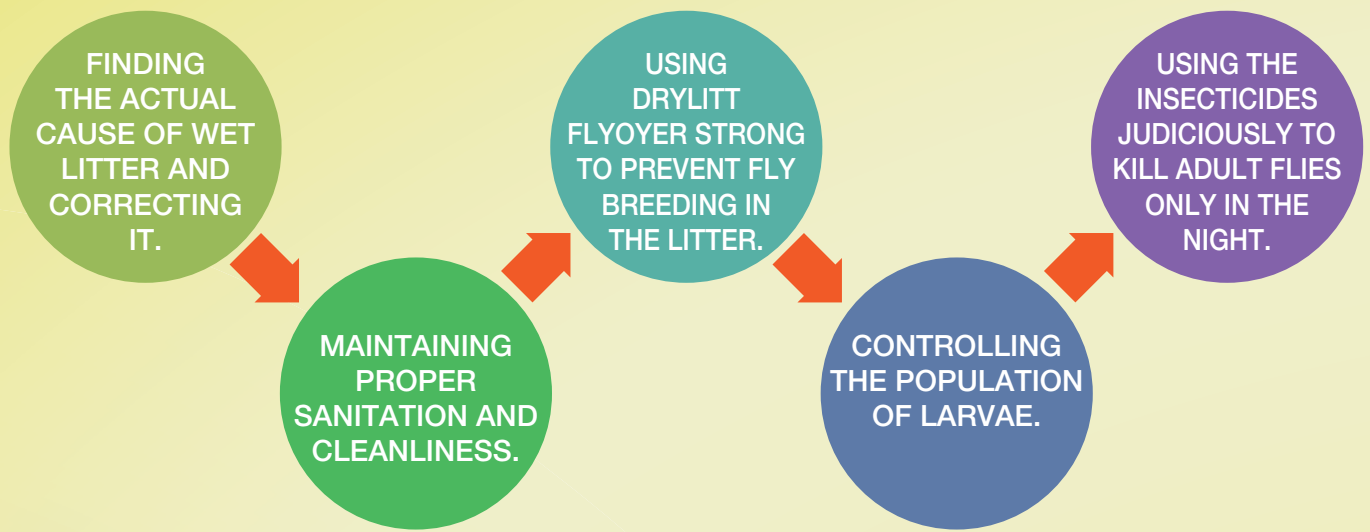

DRYLITT

Fly Over
STRONG

Preventive measure to control the fly breeding in the litter.

Insecticides are commonly used by Poultry Farmers. But spraying chemicals alone does not solve the problem. A holistic approach is required to maintain sanitation. Awareness, identification and being proactive are the keys to protect your environment.

These keys will open the doors to productivity, profitability and progress.

- Start using DRYLITT FLYOVER STRONG before the fly season starts.
- Compatible with all type of feed ingredients and also all types of medication and supplements.
- A novel physical control product, that is Natural, Sustainable, Non poisonous and Resistance Free for overcoming the fly menace.
- The antifeedant components deter larvae from eating the litter, thus affecting the larval development.
- Stop the breeding of flies on a large scale – as Drylitt flyover Strong assists in making the litter condition unfavorable for the flies to breed.
- Observe the litter on use of our product. It will get dry, There will be less larvae and eggs.
- The reduced number of larvae, eggs in the litter means our products are working.
- DRYLITT FLYOVER STRONG Is the Best Tool to Combat Fly Menace and Safeguard the Productivity of the Farm.
- DRYLITT FLYOVER STRONG assists in making the litter condition unfavourable for the flies to breed.
- Usage of DRYLITT FLYOVER STRONG results in a major reduction of larvae and eggs.
- REDUCTION OF FLIES =HEALTHY & PROFITABLE FARM.
- **A Successful and Profitable Poultry Farm Always Manages Flies Smartly.**

Feeding recommendation: 1Kg./Ton of feed.
