

NUTRIMARK

THE ALL NATURAL FEED SUPPLEMENT DERIVED FROM
**TROPICAL SEAWEEDS FOR
POULTRY, AQUACULTURE & LIVESTOCK**

NOTE : NUTRIMARK is made from 100 % natural resources.
It is completely safe to use in Livestock, Poultry & Aquaculture.

NUTRIMARK FOR POULTRY :

Apart from amino acids, flavonoids, fats, cytokinins etc. NUTRIMARK also provides 60 elements (macro & micro) in the natural chelate form along with sulfonated polysaccharides and these minerals are absorbed in to the blood stream and escorted to various organs of the body. The specific mineral activates the specific enzyme to perform its normal function and the slight deficiency may lead to loss in production and low profitability. Regular use of NUTRIMARK can prevent this loss and improve profitability.

Builds up defence mechanism of the body: NUTRIMARK produce SOD (Super Oxide Dismutase) and give glycoprotein coating around the cells which protects them from VIRAL PENETRATION, thus it builds up resistance against diseases in the natural way.

NUTRIMARK to increase profitability from breeders and layers : Vitamin A, E and selenium present in Nutrimark improves fertility in males and females. It also helps to increase hatchability and checks mortality. Layers give extra henhouse production and lay eggs with stronger shells, maintain longer peak production period & withstand STRESS. NUTRIMARK to get extra money from Broilers : Sixty elements, twenty one amino acids, twelve vitamins & cytokinins present in NUTRIMARK dramatically improve FCR in broilers by offering 100 - 150g extra weight gain / broiler with minimum feed consumption.

NUTRIMARK FOR AQUACULTURE :

NUTRIMARK offers all essential nutrient s required to get maximum weight gain & check mortality in Prawns and fishes like Rohu, Katla, Mrigal etc.

NUTRIMARK FOR DAIRY ANIMALS :

Increases milk yield from 500 - 1000 ml / day

Prolongs lactation period and prevents fluctuations in the daily milk production even in stress situations.

Increases fat percentage of milk.

Improves fertility rate and calf a year becomes a reality.

Regular availability of chelated minerals prevents metabolic disorders like milk fever and animals remain healthy during pre and post calving periods. Naturally the calves born are healthy !

Composition

Vitamin A	486.3 Iug/100g
Vitamin C	390.4 mg/100g
Vitamin E	1.7 mg/100g
Iron	133 mg/100g
Cobalt	0.07 mg/kg
Iodine	<5 mg/kg
Calcium	12.1 g/100g
Phosphorous	44.0 mg/100g
Magnesium	1.1 g/100g
Potassium	3.4 g/100g
Manganese	7.3 mg/100g
Zinc	2.0 mg/100g
Copper	0.5 mg/100g

RECOMMENDED DOSAGE :

Poultry :

1.5 Kg / Tonne of feed (chicks, broilers, breeders & layers)

Prawns & Fishes :

1.5 - 2 Kg / Tonne of feed

Dairy Animals:

10 - 15 g / day / animal
