

EXOTIC BIOSOLUTIONS INTRODUCES

yeamin

BALANCED NUTRITION

**POWERFUL MIX OF
VITAMINS,
MACRO MINERALS,
MICRO MINERALS,
YEAST METABOLITES
AND
LIVE YEAST CULTURE**

Dairy farms can be profitable if the cows and buffaloes can produce more milk with minimum expenses. Reducing intercalving period – to have one calf every 12-14 months helps keep a dairy herd profitable. Meeting the mineral and vitamin needs of the animals is crucial to achieve high levels of milk production, maintaining health and reproductive performance in dairy animals.

Dairy animals now get more concentrates and less fodder, which means they get considerably less Vitamins A and D than previously; while the higher milk yield increases their requirement. So, providing Vitamins A and D in addition to dietary sources is essential to maintain milk production and reproduction efficiency of animals at a higher level.

Vitamin E and Selenium are very important, as they help in improving reproductive performance in dairy animals. Other microminerals such as Copper, Cobalt, Zinc and Manganese also help the animal to maintain a healthy reproductive tract.

Packaging:
1Kg, 5 Kg & 20 Kg

Regular use of Yeamin will result in Adult cows and buffaloes to

- Improve level of milk yield
- Maintain milk fat and SNF levels
- Reduce fluctuation in daily milk yield
- Decrease somatic cell counts in milk
- Utilize feed and fodder more efficiently
- Improve reproductive performance in Calves.
- Get more weight gain
- Come to heat in shorter time
- Get pregnant earlier

Feeding Recommendations:

For top dressing:

30-50 gm/day for adult animals,

20-30 gm/day for young animals

For TMR mixing:

@ 0.3% to 0.5% of the mixed ration

Composition:

Each Kg of Yeamin contains

Vit . A	5,00,000 IU
Vit . D3	50,000 IU
Vit . E	300 mg
Nicotinamide	1000 mg
Yeast metabolites	225 gm
Cobalt	150 mg
Cu -Copper	4 gm
Zn-Zinc	8.5 gm
Mn-Manganese	1.5 gm
Iron	1.5 gm
Mg-Magnesium	6 gm
Selenium	10 mg
Ca - Calcium	165 gm
P - Phosphorus	90 gm
